Summary

Backend Developer focused on building scalable APIs and distributed backend systems with Node.js, Express.js, TypeScript, MongoDB, and SQL. Hands-on experience designing RESTful services, implementing authentication and RBAC, building microservices with RabbitMQ, and load-testing backend systems for performance and reliability. Strong interest in backend architecture, system design, and building production-oriented software.

Education

DAV College

Computer Science and Engineering

BCA (Bachelor of Computer Application) • 3rd

Amritsar • 2024 - 2027

Projects

URL Shortener API

URL Validation · Token Bucket Rate Limiting · Database Indexing · Atomic Click Tracking · Unique Short-Code Generation

<https://github.com/Jaspreet-5/URL-Shortner>

E-Commerce Application

Full-stack e-commerce platform built with React, Node.js, Express, and MongoDB, featuring authentication, RBAC, protected product management, cart and order workflows, and shipping address management.

<https://github.com/Jaspreet-5/e-commerce>

Uber Backend — Microservices

Node.js · Express.js · RabbitMQ · Docker

Built a modular ride-booking backend with separate services for users, captains, and rides. Implemented API Gateway-based routing and RabbitMQ for inter-service communication, using Docker for containerized development.
